

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2020/878

# **SAFETY DATA SHEET**

NEB25I 20-PFP 610 LOW-E BUC 1004 HR

### **SECTION 1: Identification of the substance/mixture and of the company/** undertaking

| 1.1 Product identifier |                                       |
|------------------------|---------------------------------------|
| Product name           | : NEB25I 20-PFP 610 LOW-E BUC 1004 HR |
| SDS code               | : 8254274<br>NEB25I/20KG              |

### 1.2 Relevant identified uses of the substance or mixture and uses advised against

| Identified uses                |  |  |
|--------------------------------|--|--|
| Powder coating. Industrial use |  |  |
|                                | Uses advised against                                 |  |
| All other uses                 |  |  |
| Product use                    | : Electrostatic coating for use in industrial plants |  |

### 1.3 Details of the supplier of the safety data sheet

AkzoNobel Powder Coatings Limited Stoneygate Lane, Felling, Gateshead. NE10 0JY United Kingdom e-mail address of person : sdsfellinguk@akzonobel.com responsible for this SDS <u>National contact</u> 01 8092566 or 01 8379964

# 1.4 Emergency telephone number

| National advisory body/Poison Centre |  |  |  |  |
|--------------------------------------|--|--|--|--|
| : +44 (0)344 892 0111                |  |  |  |  |
|                                      |  |  |  |  |
| : +44 0191 469 6111                  |  |  |  |  |
| :                                    |  |  |  |  |
|                                      |  |  |  |  |

### **SECTION 2: Hazards identification**

### 2.1 Classification of the substance or mixture

Product definition : Mixture

### Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Not classified.

The product is not classified as hazardous according to Regulation (EC) 1272/2008 as amended. See Section 11 for more detailed information on health effects and symptoms.

### 2.2 Label elements

| Date of issue/Date of revision | : 16-11-2022 | Version : 1.01 |           |
|--------------------------------|--------------|----------------|-----------|
| Date of previous issue         | : 4-8-2022   | 1/13           | AkzoNobel |

### SECTION 2: Hazards identification Signal word : No signal word.

| Signal word   | :   | No signal word.  |  |  |
|---|-----|--|--|--|
| Hazard statements   | :   | No known significant effects or critical hazards.  |  |  |
| Precautionary statements  |     |  |  |  |
| Prevention  | :   | Do not get in eyes, on skin, or on clothing.   |  |  |
| Response  | :   | Not applicable.  |  |  |
| Storage   | :   | Not applicable.  |  |  |
| Disposal  | :   | Sispose of contents and container in accordance with all local, regional, national and international regulations.          |  |  |
| Supplemental label elements   | :   | Contains 1,2,2,6,6-pentamethylpiperidin-4-ol. May produce an allergic reaction.<br>Safety data sheet available on request. |  |  |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | :   | Not applicable.  |  |  |
| Special packaging requirem  | ner | ts   |  |  |
| Containers to be fitted<br>with child-resistant<br>fastenings   | :   | Not applicable.  |  |  |
| Tactile warning of danger   | :   | Not applicable.  |  |  |
| 2.3 Other hazards   |     |  |  |  |
| Product meets the criteria<br>for PBT or vPvB according<br>to Regulation (EC) No.<br>1907/2006, Annex XIII  | :   | This mixture does not contain any substances that are assessed to be a PBT or a vPvB.                                      |  |  |
| Other hazards which do not result in classification   | :   | May form combustible dust concentrations in air.   |  |  |

# **SECTION 3: Composition/information on ingredients**

| 3.2 Mixtures : Mixture              |                                 |    |   |      |
|-------------------------------------|---------------------------------|----|---|------|
| Product/ingredient name             | Identifiers                     | %  | Regulation (EC) No.<br>1272/2008 [CLP]  | Туре |
| 7,2,2,6,6-pentamethylpiperidin-4-ol | EC: 219-292-8<br>CAS: 2403-89-6 | <1 | Acute Tox. 4, H302<br>Skin Corr. 1B, H314<br>Skin Sens. 1, H317<br>Aquatic Chronic 2,<br>H411 | [1]  |
|                                     |                                 |    | See Section 16 for<br>the full text of the H<br>statements declared<br>above.                 |      |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section. <u>Type</u>

### **SECTION 3: Composition/information on ingredients**

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

[6] Additional disclosure due to company policy

Occupational exposure limits, if available, are listed in Section 8.

### SECTION 4: First aid measures

### 4.1 Description of first aid measures

| Eye contact                | <ul> <li>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower<br/>eyelids. Check for and remove any contact lenses. Get medical attention if irritation<br/>occurs.</li> </ul>   |
|----------------------------|---|
| Inhalation                 | : Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>Get medical attention if symptoms occur. In case of inhalation of decomposition<br>products in a fire, symptoms may be delayed. The exposed person may need to be<br>kept under medical surveillance for 48 hours.                                  |
| Skin contact               | <ul> <li>Flush contaminated skin with plenty of water. Remove contaminated clothing and<br/>shoes. Get medical attention if symptoms occur.</li> </ul>  |
| Ingestion                  | : Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur. |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training.  |

### 4.2 Most important symptoms and effects, both acute and delayed

There are no data available on the mixture itself. The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly. See Sections 2 and 3 for details.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact. Coating powders can cause localised skin irritation in folds of the skin or under tight clothing.

Contains 1,2,2,6,6-pentamethylpiperidin-4-ol. May produce an allergic reaction.

### **Over-exposure signs/symptoms**

| Eye contact  | : Adverse symptoms may include the following:<br>irritation<br>redness                    |
|--------------|---|
| Inhalation   | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing |
| Skin contact | : No specific data.   |
| Ingestion    | : No specific data.   |

### 4.3 Indication of any immediate medical attention and special treatment needed

| Notes to physician  | : In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours. |
|---------------------|--|
| Specific treatments | : No specific treatment.   |

# **SECTION 5: Firefighting measures**

| _   | -   |  |  |  |
|---|---|--|--|--|
| 5.1 Extinguishing media                           |   |  |  |  |
| Suitable extinguishing media                      | : Use dry chemical powder.  |  |  |  |
| Unsuitable extinguishing media                    | Avoid high pressure media which could cause the formation of a potentially explosible dust-air mixture.   |  |  |  |
| 5.2 Special hazards arising                       | rom the substance or mixture  |  |  |  |
| Hazards from the substance or mixture             | : May form explosible dust-air mixture if dispersed.  |  |  |  |
| Hazardous combustion<br>products                  | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>nitrogen oxides<br>sulfur oxides<br>metal oxide/oxides  |  |  |  |
| 5.3 Advice for firefighters                       |   |  |  |  |
| Special protective actions for fire-fighters      | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.                                      |  |  |  |
| Special protective<br>equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. |  |  |  |

# **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, pro  | tective equipment and emergency procedures   |
|--------------------------------|--|
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing dust. Put on<br>appropriate personal protective equipment.            |
| For emergency responders       | : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| 6.2 Environmental precautions  | : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).  |
| 6.3 Methods and material for   | containment and cleaning up  |
| Small spill                    | : Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Vacuum or sweep up material and place in a designated, labelled waste container. Dispose of via a licensed waste disposal contractor.  |
| Large spill                    | : Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labelled waste container. Avoid creating dusty conditions and prevent wind dispersal. Dispose of via a licensed waste disposal contractor. |

### **SECTION 6: Accidental release measures**

| 6.4 Reference to other sections | emergency contact information.<br>information on appropriate personal protective equipment. |
|---------------------------------|---|
| 30010113                        | or additional waste treatment information.  |

### **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 7.1 Precautions for safe handling

| Protective measures                    | : Put on appropriate personal protective equipment (see Section 8). Avoid breathing dust. Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Prevent dust accumulation. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Electrical equipment and lighting should be protected to appropriate standards to prevent dust coming into contact with hot surfaces, sparks or other ignition sources. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by earthing and bonding containers and equipment before transferring material. |
|--|--|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is<br>handled, stored and processed. Workers should wash hands and face before  |

**occupational hygiene** handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

| 7.3 Specific end use(s)              |                  |
|--------------------------------------|------------------|
| Recommendations                      | : Not available. |
| Industrial sector specific solutions | : Not available. |
|                                      |                  |

### **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

### 8.1 Control parameters

Occupational exposure limits

| No exposure limit value known        | 1.  |                |  |
|--------------------------------------|---|----------------|--|
| Recommended monitoring<br>procedures | If this product contains ingredients with exposure limits, personal, workplace<br>atmosphere or biological monitoring may be required to determine the effective<br>of the ventilation or other control measures and/or the necessity to use respirat<br>protective equipment. Reference should be made to monitoring standards, su<br>the following: European Standard EN 689 (Workplace atmospheres - Guidan<br>the assessment of exposure by inhalation to chemical agents for comparison<br>limit values and measurement strategy) European Standard EN 14042 (Work<br>atmospheres - Guide for the application and use of procedures for the assess<br>of exposure to chemical and biological agents) European Standard EN 482<br>(Workplace atmospheres - General requirements for the performance of proce<br>for the measurement of chemical agents) Reference to national guidance<br>documents for methods for the determination of hazardous substances will also<br>required.<br>:16-11-2022 Version :1.01 |                | ine the effectiveness<br>y to use respiratory<br>g standards, such as<br>heres - Guidance for<br>or comparison with<br>N 14042 (Workplace<br>for the assessment<br>dard EN 482<br>mance of procedures<br>al guidance |
| Date of issue/Date of revision       | : 16-11-2022  | Version : 1.01 |  |
| Date of previous issue               | : 4-8-2022  | 5/13           | AkzoNobel  |

| SECTION 8: Exposure controls/personal protection |   |  |  |  |
|--|---|--|--|--|
| Body protection                                  | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |  |  |  |
|  | Personnel should wear protective clothing. Care should be taken in the selection of protective clothing to ensure that inflammation and irritation of the skin at the neck and wrists through contact with the powder are avoided.  |  |  |  |
| Other skin protection                            | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |  |  |  |
| Respiratory protection                           | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.  |  |  |  |
| Environmental exposure controls                  | : Emissions from ventilation or work process equipment should be checked to<br>ensure they comply with the requirements of environmental protection legislation.<br>In some cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels. |  |  |  |

### **SECTION 9: Physical and chemical properties**

### 9.1 Information on basic physical and chemical properties

| <u>Appearance</u>                               |   |  |

Minimum ignition energy (mJ) : 5 to 20

| SECTION 10: Stability and reactivity       |  |  |  |  |
|--|--|--|--|--|
| 10.1 Reactivity                            | : No specific test data related to reactivity available for this product or its ingredients.   |  |  |  |
| 10.2 Chemical stability                    | : The product is stable.   |  |  |  |
| 10.3 Possibility of<br>hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.  |  |  |  |
| 10.4 Conditions to avoid                   | : Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by earthing and bonding containers and equipment before transferring material. Prevent dust accumulation. |  |  |  |
| 10.5 Incompatible materials                | : Reactive or incompatible with the following materials: oxidising materials   |  |  |  |
| 10.6 Hazardous<br>decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced.   |  |  |  |

### **SECTION 12: Ecological information**

### 12.1 Toxicity

There are no data available on the mixture itself.

Coating powder residues should not be allowed to enter drains or watercourses or be deposited where they could affect ground or surface waters.

The mixture has been assessed following the summation method of the CLP Regulation (EC) No 1272/2008 and is not classified as hazardous to the environment, but contains substance(s) hazardous to the environment. See section 3 for details.

**Conclusion/Summary** : Not available.

### 12.2 Persistence and degradability

**Conclusion/Summary** : Not available.

### 12.3 Bioaccumulative potential

| Date of issue/Date of revision | : 16-11-2022 | Version : 1.01 |           |
|--------------------------------|--------------|----------------|-----------|
| Date of previous issue         | : 4-8-2022   | 9/13           | AkzoNobel |

### **SECTION 12: Ecological information**

| Product/ingredient name               | LogPow | BCF | Potential |
|---------------------------------------|--------|-----|-----------|
| 2,2,6,6-pentamethylpiperidin-<br>4-ol | 1.15   | -   | low       |

### 12.4 Mobility in soil

| Soil/water partition coefficient (Koc) | : Not available. |
|--|------------------|
| Mobility                               | : Not available. |

#### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

| 12.6 Other adverse effects | : No known significant effects or critical hazard | s. |
|----------------------------|---|----|
|----------------------------|---|----|

### **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 13.1 Waste treatment methods

| <u>Product</u>          |   |  |
|-------------------------|---|--|
| Methods of disposal     | : | The generation of waste should be avoided or minimised wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation<br>and any regional local authority requirements. Dispose of surplus and non-<br>recyclable products via a licensed waste disposal contractor. Waste should not be<br>disposed of untreated to the sewer unless fully compliant with the requirements of<br>all authorities with jurisdiction. |
| Hazardous waste         | : | Within the present knowledge of the supplier, this product is not regarded as hazardous waste, as defined by EU Directive 2008/98/EC.  |
| Disposal considerations | : | Do not allow to enter drains or watercourses.<br>Dispose of according to all federal, state and local applicable regulations.<br>If this product is mixed with other wastes, the original waste product code may no<br>longer apply and the appropriate code should be assigned.<br>For further information, contact your local waste authority.   |

### European waste catalogue (EWC)

The European Waste Catalogue classification of this product, when disposed of as waste, is:

| Waste code              | Waste designation   |
|-------------------------|---|
| EWC 08 02 01            | waste coating powders   |
| Packaging               |   |
| Methods of disposal     | : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.  |
| Disposal considerations | <ul> <li>Using information provided in this safety data sheet, advice should be obtained from<br/>the relevant waste authority on the classification of empty containers.<br/>Empty containers must be scrapped or reconditioned.<br/>Dispose of containers contaminated by the product in accordance with local or<br/>national legal provisions.</li> </ul> |
| Special precautions     | : This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.   |
